PROLIM

Low code platform

MENDIX

Mendix-low code platform

Mendix is designed to accelerate enterprise application development and deployment. This platform offers both no code (business domain experts) and low code (professional technical developers) options.

Our Solutions

CPQ
(Configure, Price, Quote)

CPQ is a tool used by Sales Representatives to quickly and accurately generate quotes for specific orders, along with a complete pricing proposal real-time within minutes.
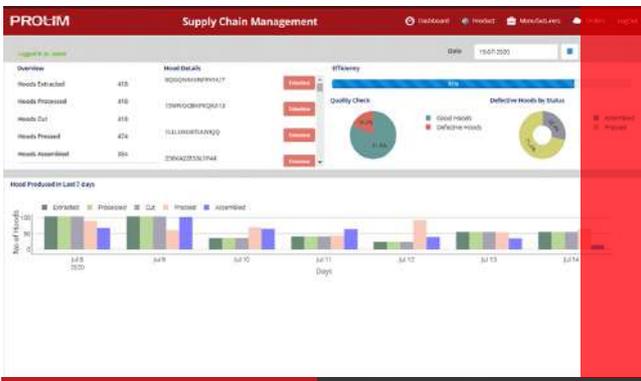

PLM RoI Calculator

The PLM RoI Calculator Solution analyses and quantifies the impact of technology and resources in a process and evaluates the productivity of the investment taking into consideration all the tasks performed at different levels of product development approximating the productivity boost enabled by the technology.
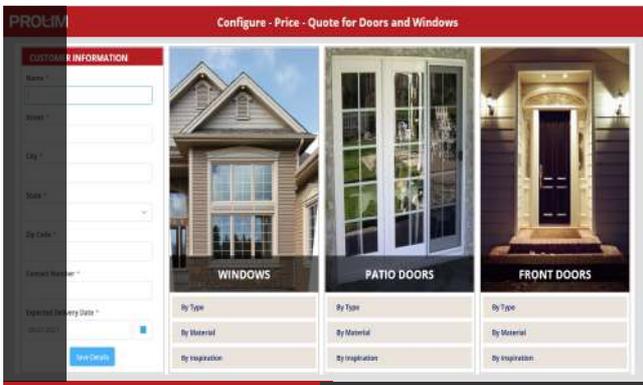

PROLIM

Our Solutions

Service Management

Issue management Application using mendix is a business solution, that lets you track,monitor and handle feedback from customers in a simple way. It allows a customer to report complaints easily and helps the customer service representative to address the complaints quickly and efficiently.

Supply Chain Management

Supply chain management using Mendix is a Real-time platform to manage and track the end-to-end flow of materials from point of origin to point of consumption including quality checks at every point in the journey. This can be implemented in any supply chain ecosystem to have transparent process management, easy to track, and visualize the entire process in a dashboard on your computer, tablet or mobile.

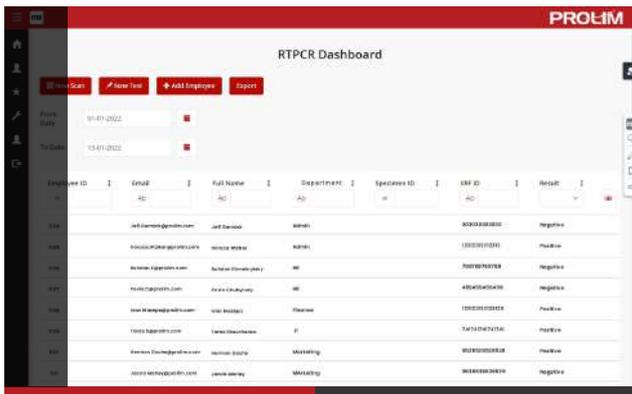

CPQ Doors and Windows

CPQ Doors and Windows allows sales Representatives to generate accurate quotes and complete proposals within minitus on handheld devices. This solution is developed considering the requirements to build Windows, Patio Doors and Front Doors.

Energy Resource Management

Windmill Monitoring Application developed using Mendix provides a Dashboard to monitor the health of windfarms and windmills. It also displays alerts and various metrics/analytics in visual graphs and charts which can be monitored by the Administrator and take necessary corrective action in a timely manner if required.
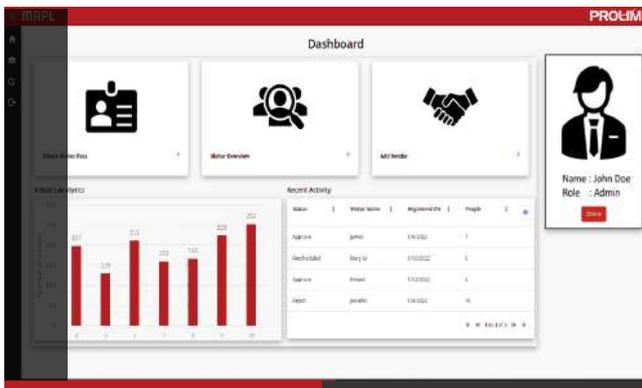

PROLiM

Our Solutions

RTPCR Tracking Application

RTPCR Tracking Application tracks Covid test schedule and results for every employee entering the company premises. Application allows to scan QR code on Employee ID to retrieve the details

Tandem Press Line for Auto

The Solution measures the OEE which helps management gain important insights on how to systematically improve the manufacturing process. It monitors the Key Performance Indicators (KPI) using equipment availability, productivity, and quality metrics to calculate a value that summarizes how well the production line is operating.

Visitor Pass Management

Visitor Pass Management application generates a temporary visitor pass with a unique code. Individual details are captured and sent through approval process. Once approved, pass will be printed and provided to the visitor immediately.
